## International College of Dentists

India, Sri Lanka & Nepal Section

November 11-12, 2011

Hotel Lalit, New Delhi, India

---

It gives us an immense pleasure to extend you a warm invitation to the first ever **Global Dental Congress** to be hosted by the International College of Dentists, India, Sri Lanka & Nepal Section.

It is a very proud occasion for us that the International College of Dentists, India, Sri Lanka & Nepal Section is hosting its Central Council Meeting in New Delhi on November 10-13, 2011 when about 40 Fellow representatives and their spouses from different sections of the world will be coming to attend this meeting. To coincide with the historic moment a unique congress has been planned to discuss and share the various aspects of present day dentistry at one platform.

The INDIAN dental fraternity has gained much expertise, greater recognition and a far more impacting image in the international arena. Inspired by this spirit the ICD section has endeavored to put together a very contemporary scientific session bringing together experts in clinical dentistry to share their experience in trouble shooting. The theme would revolve around addressing the failures and ensuring predictability of treatment outcomes. Restorative techniques, prevention philosophies, periodontal -systemic nexus, aesthetic enigmas and implant friendly formula will be a few of the topics that will occupy the scientific transfer time during the congress.

We are looking forward to an active participation from our fellows and other dental professionals from across the country to this scientific extravaganza.

Delhi looks forward to extend its hospitality to you. Please take this opportunity to meet new and old colleagues. Let it be a memorable experience for both you and us.

*With Warm Wishes*

Dr. Mahesh Verma  
Conference Chairperson

Dr. Rajiv K. Chugh  
Conference Organising Secretary

## MESSAGE FROM SCIENTIFIC CONVENER, DR. A. KUMARSWAMY

The globe is shrinking and is endorsed by the fact that the desire to learn and the thirst for furthering knowledge has shed barriers and bridges the oceans. The International College of Dentists, India, Sri Lanka, Nepal section has convened this Global Congress keeping in mind that all our knowledge has to benefit the patients visiting our clinics seeking relief, replacement and repair. The theme is 'Trouble shooters world wide', aimed at addressing common pitfalls and pitstops in clinical practice. The Scientific podium will be featuring clinicians of great repute and rich experience. The ethical and moral aspect of practice too would be dealt in a panel discussion. All in all it is slated to be the mother of all conferences in India and I would most humbly invite all to partake in this scientific transfer.

# ICD Global Dental Congress 2011
